About Abound

Lutheran Social Services Abound Counseling offers competent clinical counseling services in a confidential setting in communities across the state of North Dakota.

Abound Counseling serves people of all ages, but has a concentration of therapists who work with very young children. Abound Counseling works to ensure that families are involved in the therapeutic process, and that all involved develop skills that support well-being.

In addition to serving children who have experienced trauma, the Abound network includes therapists who specialize in grief counseling, couples therapy, and in providing care to veterans and military families. They personalize Abound’s commitment to healing.

Cost of Care

LSSND wants to help families manage the cost of behavioral health care by making all payment sources available. The cost of services can be paid by Medicaid, Medicare, most private insurances, or by the client.

In addition we have the LSSND Abundant Care Fund to offer limited financial assistance to clients without other means to pay for care.
